R	#14 x 3/4" sht metal screws	2141601	7
S	#8 x 3/8" sht metal screws	2130300	5

1. Install 1 pair of false sides for one drawer assembly with (4) bolts and nuts, aligning with holes provided on each side. See detail (E), then insert drawers. NOTE: differences between left & right.

2. Next, install (2) shelves (I) as shown above with (4) bolts & nuts each shelf. NOTE: that false sides are not used for this assembly. Total (8) bolts & nuts for two shelves.

3. After attaching lock to door per instructions on lock bag, install door by attaching hinge assembly to inside post with (5) #8 x 3/8" sheet metal screws.

4. Top can then be installed with (7) screws. Tighten all screws securely

5. Drawer Removal: Pull drawer to a fully opened position. Then push back drawer approximately one-half inch. Using the head of a small blade screwdriver, go through the missle shaped opening on the aluminum drawer slide and depress the drawer tabs located on each side of the drawer. The drawer will now remove easily.

   Drawer Assembly: Located on each side of the drawer, open drawer tabs slightly outward. Install aluminum slides with the channels of the false sides and push inward. Drawer tabs will engage drawer stops to secure drawers.
